

The house-Project **BRUNNEN 183** in Berlin-Mitte exists since 16 years, it hosts several political art n culture projects and the umsonstladen (freeshop). Three years ago we -the people living in the house- were ready, to buy the house and the ground on wich it stands, the financial plan was made, we were waiting for the day of the auction.

Two days before the auction was supposed to happen, the bank sold the house to Dr. Kronawitter, a member of the Bavarian Conservative Party CSU, who refused to negotiate with us, or to acknowledge our rights as tenants.

Meanwhile we lost all the juridical fights, we are now facing the danger of eviction on a daily basis.

Its time for the mayor and the finance-senator of Berlin to stop blocking the only possible solution(...more info www.brunnen183.de...)
and with it our only chance to not loose the house.

They have to understand:

We have the right, to live in a self-organized way!!
